International Conference

22 May 2024

Polo Territoriale di Mantova,
Politecnico di Milano

Organising Committee

Elisa Boeri, Politecnico di Milano
Francesca Giudetti, Politecnico di Milano
Fabio Marino, Politecnico di Milano
Michela Pilotti, Politecnico di Milano

The **abstract** should not exceed 500 words and you are kindly asked to provide the following information: Author (Name Surname, e-mail), Essay's title, Institutional Affiliation, Short Bio, Keywords (max. 5), Selected Bibliography.

Please send your abstract to: architecture-fragility-dabc@polimi.it

Architecture and coastal tourism (1960-1980): fragility between historical studies and new scenarios

International Conference
22 May 2024

The conference promotes a transdisciplinary and transcultural reflection on the complex relationship between architecture and contexts of fragility, with particular attention to coastal areas. The objective of the conference is to shed light on new studies regarding the architectures and urban transformations that have impacted and altered coastal territories from the 1960s to the present.

By contextualizing the selected examples within economic, political, and social geographies, the event also aims to discuss the possible future developments of these places and their current value in relation to the urban and territorial scale. Despite the numerous "failures" in territorial planning, there are, however, multiple cases of significant public and private architectures in the field of critical architectural studies.

The initiative will adopt a dual approach, first considering the historical study and theoretical and design debate on tourist architecture that reached its climax between the 1960s and 1980s. Simultaneously, the focus will be on the transformations that have affected architectural and landscape heritage, through the possible identification of critical, theoretical, and design models capable of addressing the evolution of the built environment in relation to coastal territories. From this perspective, reinterpreting and re-discovering projects developed by 20th-century

architects from their archives would be especially appreciated to reflect on new architectures and built landscapes.

The conference, promoted by ABC Department of Politecnico di Milano and Polo Territoriale di Mantova, advocates a comparative methodology from both thematic and disciplinary perspectives. The research subject will be considered within a geographical scope encompassing both major and minor Italian, European, and non-European urban realities, through a multidisciplinary approach. To this end, we highly encourage intervention proposals related to case studies from broader geographies, not confined to the Mediterranean coast.

Finally the symposium invites scholars and researchers from around the world to share their works and ideas according to the following areas of investigation, but not limited to:

- 1) Mass tourism vs. elite tourism;
- 2) Tourist architecture between tradition and fiction;
- 3) Coastal areas and controversial constructions: cultural and political debate;
- 4) The attractiveness of vulnerable and marginalized contexts;
- 5) Narrating the coast through design processes and profitable tourism dynamics.

Call for Abstract

The abstract should not exceed 500 words and you are kindly asked to provide the following information: Author (Name Surname, e-mail), Essay's title, Institutional Affiliation, Short Bio, Keywords (max. 5), Selected Bibliography.

Please send your abstract to: architecture-fragility-dabc@polimi.it

Conference: May 22nd 2024

Venue: Mantua (Polo Territoriale di Mantova, Politecnico di Milano), hosted within MantovArchitettura 2024

Abstracts Due: January 11, 2024

Notification of Acceptance: by February 1, 2024

Organising Committee:

Elisa Boeri, Francesca Giudetti, Fabio Marino, Michela Pilotti
(Politecnico di Milano, ABC - Department of Architecture, Built environment and Construction engineering)

Scientific Committee:

Carmen Andriani (Università degli Studi di Genova)
Paola Barbera (Università degli Studi di Catania)
Orazio Carpenzano (Sapienza Università di Roma)
Salomon Frausto (TU - Delft University of Technology)
Jean-Philippe Garric (Università Paris 1 Panthéon-Sorbonne)
Giovanni Leoni (Università di Bologna)
Caroline Maniaque (ENSA - École Nationale Supérieure d'Architecture de Normandie)
Raffaella Neri (Politecnico di Milano)
Sergio Pace (Politecnico di Torino)
Antonio Pizza (UPC - Universitat Politècnica de Catalunya)
Michela Rosso (Politecnico di Torino)
Marida Talamona (Università degli Studi Roma Tre)
